

MGEN LCA Adapter

MGEN LCA Adapter for IBM Rational Quality Manager

MGEN LCA Adapter provides seamless integration between Rational Quality Manager(RQM) and ETAS LABCAR Automation(LCA)

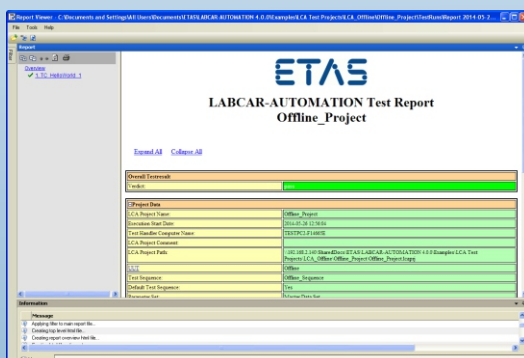

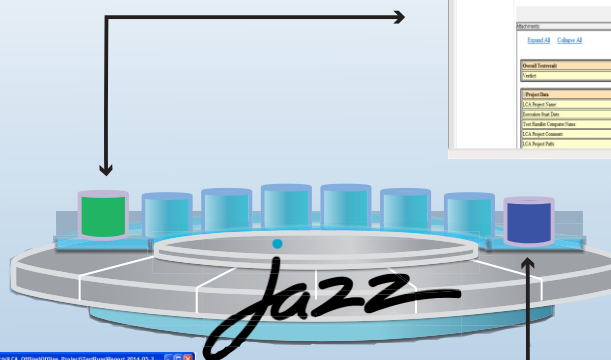

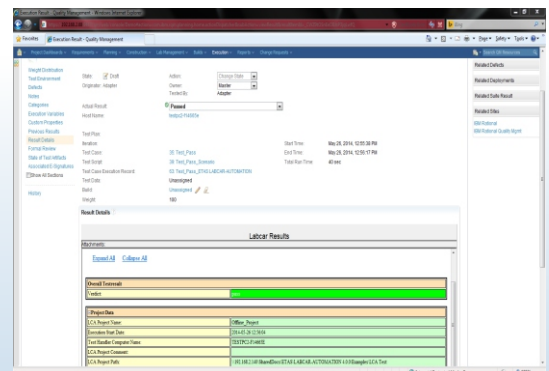

Capabilities:

- Test Case Traceability - ETAS LABCAR Automation testcases linked to IBM RQM Test Case provides traceability to other project aspects such as requirements, test plan, project plan, change/defect management system.
- Automation - ETAS LABCAR Automation testcases linked to IBM RQM can be invoked from IBM RQM. Execution status reported by ETAS LABCAR Automation is also displayed in IBM RQM.
- Test Case Results Management - Upon completion of ETAS LABCAR Automation execution, outputs from the run are automatically published to IBM Jazz® storage and linked to IBM RQM Test Case result.

Benefits

- Provides facility to link ETAS LABCAR Automation testcases to RQM testcases.
- Enables traceability from requirements to ETAS LABCAR Automation testcase results.
- Centralized execution of ETAS LABCAR Automation testcases from RQM
- Provides capability to view ETAS LABCAR Automation reports in RQM.
- Testcases can be run on multiple ETAS LABCAR Automation systems simultaneously.
